
Mode A: Linear Projection
P_m ∈ R^(D_shared × D_m)
orthogonal, frozen
MSE 1.14 (v10 baseline)
MSE 1.14 (v14 baseline)
Mode B: Mean Aligner
learned per-base W_m
+ cross-base mean
MSE 0.48 (v10)
+54.5% over A
Mode C: Cross-architecture Attention Aligner
shared K/V from cross-base mean
per-base Q, attended concept vector
MSE 0.34 (v10) / 0.34 (v14)
+67.0% over B
Mode D: Mixture Aligner
n=4 small shared experts per base
M×n experts with attention over pooled context
MSE 0.26 (v14)
+77.4% over A
nesting regresses
Nested Mixture (Mixture-of-Mixture)
MSE 0.27 (v15)
−4.7% vs D — saturates
